

Lincoln City Foundation
Environmental Statement

Lincoln City Foundation is committed to minimising the impact of its activities on the environment where reasonable and affordable alternatives are available.

Lincoln City Foundation, through its operational duties and plans for growth will consider the environment and research possible alternatives available and implement where we are confident it can sustainably benefit the environment.

The key points of its strategy to achieve this are:

- Minimise waste by evaluating operations regularly and ensuring they are as efficient as possible
- Minimise the use of harmful toxins through choosing environmentally friendly cleaning products and packaging
- Actively promote where recycling options are available both internally and amongst its customers and suppliers
- Meet or exceed all the environmental legislation that relates directly to the company or industry
- Increase recycling of office waste, such as paper, through an external company
- Encourage travel options that reduce the Foundation's carbon footprint.
